

# Rubenstein Limbal Relaxing Incision Kit<sup>1</sup>

"Today, with cataract surgery producing the same expectations as refractive surgery, the surgeon must be able to achieve astigmatic neutrality after surgery. Limbal relaxing incisions provide an effective technique to reduce astigmatism. Accutome's newest limbal relaxing incision knife is a reliable and easy to use instrument that should be on every cataract surgeons tray."

- Jonathan B. Rubenstein, M.D.
