

We're Your Site for Their Sore Eyes.

Pets are a part of the family. So when it comes to their all-important eye care, their parents will all agree that they deserve the benefits of more than 40 years of ophthalmic industry experience, technology, and innovation.

We think so, too. That's why Accutome is proud to offer an all-new line of one tap tonometers, scalpels, blades, disinfectants, syringes, gloves, and so much more, designed just for veterinarians, in order to better help our furry, feathered, and four-legged friends.

Get the best equipment and instruments you need to for the delicate work you do. **The choice is clear. The choice is Accutome.**
